

Take control of your career planning.

Introducing our professional development planning (PDP) tool.

Check it out

[Name], being thoughtful about our careers is critical if we want to build lives of meaning and purpose. But while it’s **always important**, career planning is **rarely urgent**. Barring a major life event, it's the type of project that can stay forever at the bottom of our to-do list, making us feel stuck and unengaged in our current roles.

We created the PDP tool to help learners get un-stuck by becoming reflective and intentional about their career goals in a systematic and streamlined way. You can use the PDP tool to:

- 

Rank your professional values
- 

Compare potential career paths
- 

Chart a course for achieving your goals
- 

Prepare for talks with your manager
